**FOR IMMEDIATE RELEASE**

## **N2Power Adds Anthony Iacovino as US Eastern Regional Vice President**

*N2Power's latest hire will bolster the company's sales presence on the East Coast, driving new relationships and collaborations.*

**CAMRILLO, Calif.—August 11, 2020**—A leading manufacturer of compact, ultra-efficient power supplies (PSUs), N2Power is pleased to announce that Anthony Iacovino has joined the company as its new US eastern regional vice president. Bringing to bear more than two decades of experience in electronics sales, he will work to develop new opportunities and partnerships in the eastern regions of the United States and Canada.

Prior to joining N2Power, Iacovino was vice president of sales for New Yorker Electronics. He also spent time working the east coast region for Marshall Electronics, Nu Horizons, and Arrow Electronics, selling products that included the N2Power product line. During his long career, he has worked with clients at every level of the industrial, medical, and telecommunications industries.

“We are excited to bring Anthony aboard our team during this time of strategic growth,” says Al Garcia, general manager of N2Power. “Not only does he bring to the table intimate knowledge of the East Coast electronics industry, he is also already familiar with our product line and has worked with our team through distribution partners for years.”

As N2Power continues to expand and bring new products to market, Iacovino will be instrumental in developing relationships with new clients in its core markets and beyond.

### **About N2Power**

N2 Power was founded in Southern California in 1999 as a designer and manufacturer for the OEM market of state-of-the-art, ultrasmall standalone switch-mode power supplies and power assemblies that are reliable, energy efficient, and environmentally friendly. Building off our track record of innovation and reliability, today our UL and ISO certified line with efficiencies of 90% plus, encompasses a range of standard, modified standard, and value-added power solutions for the ITE, broadcast, industrial, kiosk, medical, gaming, lighting, and test equipment markets, among others. While still based out of our California, headquarters, we have expanded our global footprint and partnerships in recent years giving us access to new markets and increased development capabilities. Capitalizing on our

expertise and more than 20 years of experience in power design, our in-house engineering team works closely with each individual customer to ensure the very best solution is integrated into their final product design. N2Power is a wholly owned subsidiary of Qualstar Corporation (OTC: QBAK).
